Our **DIGITAL COMMUNITY** Is…

Respectful
We always remember that the words we type are shared with the world! We consider the impact of our words.

Literate
We know how to use technology to help us learn. We find the right digital resources to solve a problem and meet our needs.

Responsible
We know that the online world is open to all. We are safe when surfing the web and only go where we should!

Fair
We know that just because it is online doesn't mean it is free. If we didn't write it, we need to give the author credit.

Protected
We know that what we share online can be available to others unless we protect it. We create smart passwords and think before we share!
