## CHANNEL ONE NEWS

**Channel One News** is a digital content provider focused on encouraging kids to be informed, digital-savvy global citizens. Whether it is through our daily news program with supplementary educational resources, our video library, or our news blog we help students, teachers, and parents interpret the news of the day and spark important conversations with each other.

Channel One News Premium is a subscription service that offers a daily newscast (headlines and feature stories) with two editions: Grades 3-5 and Grades 6-12. It includes associated curriculum with discussion questions, vocabulary and quizzes - plus a vast video library of 2,000+ prior Channel One News video segments, transcripts and curriculum. Each day, one feature story comes with a three part instructional routine that includes:

- **Extend:** Engaging timelines and slideshows extend the concepts introduced in the video segment and support differentiated instruction using images and text.
- **Write:** The writing prompts are focused on non-fiction and expository writing, which helps students practice a variety of non-fiction writing types such as lists, informational text, persuasive arguments, and captions.
- **Assess:** Students are asked to complete short, formative assessments to showcase their understanding and to help inform teachers' ongoing instruction.

As educators increasingly look to customize their own lesson plans, the *Channel One News* Video Library is a comprehensive resource of *Channel One News*' video segments and activities created with one goal in mind: to help students interpret the news and spark important conversations around current events.
