GO MATH! ACADEMY

GO Math! Academy is an online, at-home learning program based on Houghton Mifflin Harcourt's (HMH) *GO Math!* curriculum. *GO Math! Academy*, for Grades K–8, offers thousands of math practice problems, hundreds of help videos and plenty of games, and rewards to make learning fun. Children can work on their full grade-level curriculum in order, or they can choose individual topics and skills to work on. It is a great way to prepare for tests, to get extra support or homework help, or to keep math skills fresh over the summer.

Designed with engaging visual appeal, *GO Math! Academy* encourages kids with rewards and incentives to practice math independently, building confidence and skills in a self-directed, self-paced environment. The tool is highly flexible, offering full access to all K–8 grades so kids can review previously learned concepts or get a jump-start on new skills.

Children can move around the curriculum at will, allowing them to move fast and do content that is normally addressed at the end their grade-level curriculum. Then they move up to the next grade and continue. If parents prefer, they could set their child's grade level higher than his or her grade in school and allow their child to learn the higher grade-level material at a comfortable pace.

GO Math! Academy curriculum can be accessed in order for each grade (starting with topic 1, skill 1). Alternatively, a child can select a topic of interest further on in the curriculum. There is the freedom to skip ahead a grade or review a concept from a previous year.
