HMH**PLAYER**®
Making 1:1 Learning a Reality

JOURNEYS   collections   Escalate ◆English

TAKE LEARNING ANYWHERE

HMH Player® is the first app that fully integrates digital learning into the classroom and then extends its reach beyond the school's doors, into **any environment**, whether it has an Internet connection or not.

ONLINE OR OFFLINE

Students download HMH® lessons and assignments while at school to work offline at home with tablets or laptops they're already using (iPad®, Chromebook™, or Windows® or Mac® computer running the Chrome™ browser).

ENGAGE

Students get involved with dynamic lessons, game-based assessments, and interactive tools using touch, swiping, and simple menus they expect. Teachers can present interactive lessons to the entire class.

COLLABORATE

Students use "Raise a Hand" to ask and answer questions or request a private chat with the teacher, making it easier for teachers to spot learning gaps. And collaboration can happen outside the school's walls, as long as there is an Internet connection.

To realize the power of the *HMH Player*, **let's consider** MARTIN

Martin benefits greatly from the dynamic learning that a digital environment affords. Outside of school, however, he doesn't always have an Internet connection for accessing that valuable interactive content.

Now Martin uses *HMH Player*. Wherever he goes—at home, on the bus, in the dentist's waiting room—Martin can complete assignments in *HMH Player*—offline!

When he returns to school the next day, his work automatically uploads, and he's ready for a new day of learning.

HMH

COUNT ON CONVENIENCE

HMH Player presents a new category of access to HMH content, with flexible tools for teachers and students that synchronize with the Interactive Student Edition. For the first time, students and teachers can access select HMH online content, whether they're on- or offline, and not miss a beat.

CUSTOMIZE YOUR LESSONS

With this unique app, teachers can quickly select HMH content, link to external content, or upload their own open-source content. That means teachers can access all their resources and customized lessons from one app to present, differentiate, communicate, and monitor.

ONE LOGIN FOR ALL

One convenient login provides access to all content and assignments in HMH © 2017 literacy programs—*Journeys*, *Collections*, and *Escalate English*™—while the modern design and interface grows with students through grade levels to keep them engaged.
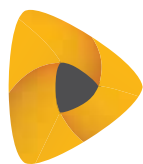

REAL-TIME TRACKING

From automatically scored assignments, track student progress with reports—by student, by grade, by class—in an intuitive grade book with real-time data.
